

FREE DB2 TECHNICAL SESSIONS

CPT Global Limited and IDUG, in association with the Melbourne, Canberra and Sydney DB2 User Groups are pleased to invite you to **free** DB2 technical sessions to be presented by John Saunders from CPT Global Limited (UK).

John will present on the following topic at each of the venues listed below and the session will be approximately 1 hour in duration:-

DB2 Dynamic SQL – Shedding Light on a Black Hole

Up until relatively recently, DB2 Dynamic SQL really was a ‘black hole’ that was capable of swallowing whole mainframes! John’s first experience was when ‘Enclave SRBs’ had just been invented and the monitoring community hadn’t really caught up. Combine DB2 Connect, some dubious Stored Procedures and a ‘bug’ in DB2 and watch your CPU utilisation grow on an exponential scale. It’s still capable of swallowing mainframes, but now there’s a window into what’s going on. Expect war stories, hints and tips, and some light!

Following the presentation, drinks and finger food will be provided.

Speaker Biography:

John Saunders has 35 years experience in the IT industry. His previous roles include those of Application Programmer, System Programmer, DBA, Performance Analyst and Consultant starting with IMS/360 through to DB2 V8. He has worked with clients in the UK, South Africa, Australia, Belgium, Germany, Austria, Switzerland, Netherlands and USA. During the last year John has been involved in tuning DB2 at 16 different client sites in 7 countries. John has also presented papers at UK CMG as well as at IDUG Conferences in Europe, Asia Pacific and USA.
